

# **FROGGER**

## **Rules :**

You can't go outside the screen by moving.

If you get hit by a car, a truck or plane, or run into one of them. you loose one life and have to restart from the first step (spawn point).

The same can being told if you jump stupidely into a crocodile head, or if you try to dive inside the river. You can walk on the turtles, but they dive into the water from time to time, so be careful.

The differents platforms which move in the river will help you to move accross it, but then can also drag you outside the screen, which will kill you.

If you loose all of your five lives or if the timer get empty, you get a "GAME OVER" and will completely loose the game.

Each level spawn randomly a setup of enemies and platforms.

If you complete the 3 levels you will win the game.

## **Goals :**

To complete a level, get the frog into the water lilies to the otherside of the river, you have to to that for every of the five water lilies.

You have to pass all the obstacles from the street and river fast enough to not run out of time.

The faster you will reach target, the higher score you will obtain !

Try your best until the end !

## **How it works :**

- Press Up to go at the next up cell
- Press Down to go at the next down cell
- Press Left to go at the next left cell
- Press Right to go at the next right cell
- Press « n » to start the game or new game
